

PROFESSIONAL SUMMARY

I architect premium backend systems, develop intelligent automation tools, and craft highly scalable APIs that power the next generation of web applications. I am deeply fascinated by how algorithms and data structures solve complex real-world problems. I thrive on building efficient, scalable systems, specializing in secure payment gateways, and intelligent automation bots.

TECHNICAL SKILLS

Languages	Python, JavaScript, PHP, C++, SQL
Frameworks & Tools	Node.js, Express.js, Docker, Linux, Git
Databases	MySQL, MongoDB, PostgreSQL
Specialized	Discord Bots, Telegram Bots, REST APIs

EXPERIENCE

Backend Developer

2023 — 2025

Specialized in crafting secure APIs, managing complex database architectures.

FEATURED PROJECTS

Special Share | Web Platform

2024

PHPJavaScriptMySQLDiscord APIPayPal

A full-featured Discord server management platform combining user interaction, server administration, and security. Features a comprehensive user dashboard with a wallet system, daily rewards, premium subscriptions, leaderboard rankings, and a server control panel with analytics, settings, and activity logs.

JusTKinG Esports | Bot Dashboard

2024

PHPJavaScriptNode.jsDiscord APIPayPal

Designed and developed a complete user control panel for an esports Discord bot. The dashboard features Discord OAuth login, a leaderboard, a background shop, and PayPal payment integration. The bot includes a comprehensive reward system, user leveling, and a temporary room management system.

Ibn Al-Hajjaj Bookstore | E-Commerce

2024

PHPMySQLJavaScriptGoogle OAuth

A complete online bookstore system providing a seamless experience for browsing and purchasing books. Features include category-based browsing, detailed book pages, stock availability, and a full shopping cart. The admin panel supports adding and editing books, managing authors, and reviewing orders.
